🐝 Honeybee FAQs 🐝

This document provides a brief overview of Honeybee FAQs. If you have any other questions, please drop into the War Room or reach out to a QM in the Outlier Community Channel!

This file will be updated continually, so keep it handy when you are tasking. 🙏

FAQ's

Question 🤔	Answer ✅
🆕 I am new to the project; where to start?	Start with the instructions and attend the first onboarding session, then you can follow up on all the changes and announcements in the daily thread in the OC along with the war rooms.
🕛 I am running out of time! Can I have a claim link to continue my task?	We are not providing claim links at this time. If your task expires, immediately select 'start tasking' on your Outlier Dashboard, and the task should come back to you. If not, try contacting support with the task ID they may help you. Please review the task expiry time before you start the task, just to be sure that you have enough time to complete it
🕛 My task expired before I could	Please contact support for this issue and

CONFIDENTIAL | rashmitasahoo2002@gmail.com+outlier | 2026-10-14T07:19:21.214Z

complete it; I spent a lot of time on it. Will there be any funds for this time?	don't raise it in the OC, as the QMs can't help with the financial issues.
🤖 The task is telling me to use one version of Gemini, but I can only see another on my Demo Account.	The version of Gemini available on your Demo account will change over time. Use the version available in the task, and make sure to turn on Extended Thinking.
📄 Gemini is refusing to connect to my Google Drive even though I know it can.	Try using the command @Google Drive to force the connector to work.
💧 My account is throwing an error when I am trying to rehydrate it. How can I fix this?	Try using the setup link. If that doesn't work, go to the War Room or Outlier Community, and a QM will help reset it for you.
🔐 I forgot the password to my demo account!	You will be able to recover it here: https://app.outlier.ai/demo-account-claim
📦 Gemini is exporting the trajectory PDF starting from the point where a conversation was continued, rather than including the full conversation.	Export the trajectory to a .docx and then print it to a PDF from there.
🔄 How can I convert the model chat to a PDF?	You can use this tool for GPT. https://chromewebstore.google.com/detail/chatgpt-exporter-save-cha/ploaaddkflkapjfbfapmkmkefigedefp?utm_source=item-share-cb&pli=1 Use this one for Claude. https://chromewebstore.google.com/detail/ai-chat-exporter-save-cla/elhmfakncmnghlnabnolalcjkdpfjnin?utm_source=item-share-cb These are the ONLY tools approved by the Project Team. For reasons of security, ONLY use tools approved by the PT!
🙏 Could you please deprioritize this project for me? How can I deprioritize this project?	Please read this thread carefully: https://community.outlier.ai/t/project-honeybee-prioritization-requests/2967470?u=ranaa_qmo_ar
🤔 What is the correct format for the uploaded files?	The format of uploaded files: My Drive / Folder 1/ …../ Folder n/

CONFIDENTIAL | rashmitasahoo2002@gmail.com+outlier | 2026-10-14T07:19:21.214Z

	file_name Calendar / Date / Event_name. Gmail / Inbox / Sender or receiver's name/ Subject / First some words of the email.
👋 Could I choose the kind of tasks I receive? As I don't want to buy any products and want to work on free versions.	No, you should purchase GPT Pro and Claude Max 20x. You will be refunded for these products after you complete the purchase form under the project name in your dashboard.
😳 I tried to fill in the purchase form, but all fields are grayed out even after entering all data!	Please contact QMs in the war room or in the OC channel; they will help you.
😶 Which demo email should I use in the purchase form? The one I created when I made the purchase or the one the company created for me for this project?	As instructed in the form, you should use the new hydrated account you used for the purchase.  Hydrated email used to purchase GPT Pro + Claude Pro Max 20x Usage Answer this if you said Yes. ⚠️ It must be the NEW email account created for this project — not your personal email, and not your Outlier login above. If you purchased on any other account we cannot reimburse it. NOTE: We will only be paying to offset **one month** of each subscription. If you do not want to pay out-of-pocket for subsequent months, cancel the subscription as soon as you have subscribed. Please respond below.
💲 I purchased the subscriptions. When can I expect to receive a payment to offset the cost of these models?	QMs do not have control over these payments. If you do not receive a payment within two cycles, please contact us.
💬 Am I allowed to use **GPT-6 Astra** with medium thinking as Model B instead of Claude Fable 5.1 for this task?	No, the task requirements are strict. You need to use the correct model for each specific task.
💸 I paid for only one model, "Claude," and I get a ChatGPT task; what should I do?	You should purchase both models, but you can skip the task for now.
💵 The invoice I have for both purchases is in my country's currency; is this OK?	Yes, no problem; the team will calculate the equivalent amount in $ and will refund

CONFIDENTIAL | rashmitasahoo2002@gmail.com+outlier | 2026-10-14T07:19:21.214Z

	you accordingly.
💬 I get ChatGPT Pro, but I have a problem with a Claude purchase; it refuses my ID verification. What should I do?	This is a Claude issue, and we don't have any authority on it. For now, you can only work on GPT tasks.
🤔 While creating the email ID on Gmail, the "_" (underscore) is not accepted.	Please use a dot '.' instead. YourName.HoneybeeEvals@gmail.com
🥛 Sorry, I am new and can't understand why we made the hydration in the first place!	The **hydration process** is used to provide the Gmail or Demo account with the specific data the client wants to include in the task. For example, this may include emails in Gmail, files in Google Drive, or dates and events in Google Calendar. Because of this, we perform the hydration process on both model accounts before starting the conversation. This ensures that the **same data is available in both accounts**, allowing both models to process the task using identical information.
🥛 I am sure that I hydrated the model correctly, but the model still can't find an existing file in the drive. What should I do?	If you are sure that you hydrated the account correctly and the model couldn't fetch a file or an image or connect to GitHub, then this is a model failure, and you should rate accordingly.
📖 The rubric is not so accurate, and the instruction said I couldn't change it. What should I do?	Yes, you are right, but this part of the instruction is not updated. You can now edit the rubric and make small changes, not totally change the criteria; just adjust it accordingly.
📂 The task provides broken links to the files. I opened the file, and it is not readable. How do I locate the file?	Use the file paths to locate the files and download them from Drive. If the file paths are also broken, come to the War Room
⭕ One criterion is N/A; which turn number should I choose?	Since this criterion is not applicable, you can choose any turn number (e.g., turn 1) and move on.

✅ The GTFA and known/not known information are blank even though the taxonomy says they should be prefilled!	The taxonomy needs to be updated. Please fill out this information yourself.
🔬 Claude won't let me complete a biology task on the correct model!	Send the task ID in the OC or War Room, and a QM will quarantine it for you!
🔗 I don't know how to save each turn link in Gemini! And should I do the same in GPT and Claude?	After each turn, click **"Share Page"** at the top right of the conversation. This will generate a link that our team can access. **Do not share the URL from the address bar at the top of your browser.** For **GPT and Claude**, if you cannot find the individual link for each turn, you can paste the **last Share Page link** into the fields for all turns in the task.
💳 Hi, I'm trying to paste the Debug Info from a Gemini turn, but it's too long, and the task page crashes. I downloaded the Debug info; it's about 16MB. Should I upload this file in the turn's attachment and clarify this action in the debug info section?	Yes, you can do this.
🚶 I can't find the model specified in the task!	Contact your QMs in OC or the war room; they will guide you on which model you should use.
⏱️ The task time is short, and both models take too long to load data! Also, the hydration process takes time as well. Is there any solution?	Yes, we know that time can sometimes be a challenge. If the model is slow, you can **refresh the page** or make a small change in your prompt and try again; just add a space and **check your internet connection**, as the issue may sometimes be temporary. If you run out of time, contact Support.
🧊 What should I do if the deliverable criteria contradict each other?	Just discuss the issue in **OC or the war room with the QMs**. If the task is incorrect, simply send them the **task ID** and skip the task. They will handle the issue from their side.

CONFIDENTIAL | rashmitasahoo2002@gmail.com+outlier | 2026-10-14T07:19:21.214Z

General notes (Do/Don’t)

Do	Don’t
Do read the instructions carefully before your first task.	**Don’t** enter the war room asking someone to solve it for you; war rooms are only for questions and technical issues.
Do purchase both GPT Pro and Claude Max 20x.	**Don’t** purchase only one of them.
Do contact support for payment issues.	**Don’t** contact QMs for payment issues, as they don’t have authority on that.
Do run Gemini with the provided email in the task.	**Don’t** use the one you created for purchase; this will be used for the second model, “GPT or Claude."
Do run one model at a time.	**Don’t** run both models at the same time.
Do use the first prompt, as it is “just copy and paste."	**Don’t** change anything in the first prompt
Do mention the file name for the model during the conversation to look for it: "EX: Edit this file [name] from my drive.”	**Don’t** upload it directly; let the model search for it.
Do make at least 20 turns in the conversation "prompt/response."	**Don’t** do fewer than 20 turns per model.

CONFIDENTIAL | rashmitasahoo2002@gmail.com+outlier | 2026-10-14T07:19:21.214Z

Do copy the task ID and all turn links aside in a sticky note or file.	**Don't** forget that, in case any technical issue happens, you need them, so you don't have to go over all this again.
Do change the files in the task if they are incorrect to the correct files.	**Don't** leave the links if they are wrong.
Do make several refreshes if the task has missing parts or fails to load.	**Don't** just skip the task; if the error is still present, send the task ID to your QM.
Do use the exact model version in the task.	**Don't** use the wrong one. If you can't find the model version in the task, contact your QM in the war room to tell you which version to use.
Do little changes to the rubric criteria to adjust them if necessary. Also, correct any misspellings or typos.	**Don't** change the criteria entirely.
In **Aspirational** tasks. **Do** hydrate both accounts before starting your conversation.	**Don't** hydrate only one of them.
Do confirm that you are using the correct universe while hydrating. The task universe may be different, so change the universe accordingly. Point to this thread: https://community.outlier.ai/t/hydration-for-aspirational-tasks/2965777?u=rana_qmo_ar	**Don't** use the wrong universe in the hydration, or everything will be wrong.
Do familiarize yourself with the universe, email, Drive, and GitHub; the deliverable criteria; and the rubric before continuing, so you can plan your conversation.	**Don't** just start the conversation directly; this will make you miss task requirements.

Do upload all generated files by the model into the task, such as: “Doc, PDF, XLS, image, flowchart in the form of images, video, ..” ***Remember:*** you should upload the last version of the file, not all the edited versions.	**Don’t** download or upload normal information, such as tables, widgets, information boxes, etc., as files. Do not save this information as HTML and upload it to the task, as this is incorrect.
